

**(Unclassified // FOUO)**  
**CSWC Operational Period Summary**  
**1800 April 05 2018 to 0600 April 06 2018**

**Never attempt to drive on or through a flooded road.**

Know what to do before, during, and after flooding. Observe basic safety tips. Turn around. Don't drown. Avoid walking or driving through flood waters. If there is a chance of flash flooding, move immediately to higher ground.

# **SITUATION SUMMARY**

## **Cal OES COASTAL REGION**

### **River Forecast – The following rivers are expected to meet or exceed Monitor Stage:**

Humboldt County:

- Eel River at Fernbridge is expected to crest at 18.5 feet at 1900 hours on 04/07/18.

## **Cal OES INLAND REGION**

### **River Forecast – The following rivers are expected to meet or exceed Flood Stage:**

Placer County:

- Truckee River at Truckee is expected to crest at 6.6 feet at 1100 hours on 04/07/18. Flood Stage is 4.5 feet.
  - Potential Impacts: Major flooding along Truckee River between Squaw Creek in the Alpine Meadows area and Truckee. About 5000 cfs. Some private bridges and low-lying structures along the river flood.

Alpine County:

- West Fork Carson River at Woodfords is expected to crest at 14.4 feet 1600 hours on 04/07/18. Flood Stage is 14.0 feet.
  - Potential Impacts: Minor flooding begins in the southwestern Carson Valley between Centerville and Genoa.
- East Fork Carson River at Markleeville is expected to crest at 8.2 feet 1700 hours on 04/07/18. Flood Stage at 8.0 feet.
  - Potential Impacts: Minor lowland flooding in Carson Valley. Some low roads, bridges, drainage structures sustain minor damage. Cottonwood Slough begins to flood Lampe Park. Flood prone areas include Washoe Indian Reservation, Carson Valley Country Club, Glenwood Dr., Riverview Dr., Centerville Rd., NV Hwy 88, Westwood Village, Rocky Slough, Waterloo Ln, and Mottsville Ln.

Mariposa County:

- Merced River, Yosemite at Pohono Bridge is expected to crest at 14.8 feet at Noon 04/07/18. Flood Stage at 10.0 feet.
  - Potential Impacts: Northside Dr. and Southside Dr., which are the main roads in Yosemite Valley, become flooded and are closed to traffic.

### **River Forecast – The following rivers are expected to meet or exceed Monitor Stage:**

Plumas County

- Middle Fork Feather River at Portola is expected to reach 7.1 feet 1700 hours on 04/08/18.

Yuba County

- Yuba River at Marysville is expected to reach 77.2 feet the evening of 04/07/18.

Colusa County

- Sacramento River at Colusa Weir is expected to reach 62.4 feet the evening of 04/08/18.

Sutter County:

- Sacramento River at Tisdale Weir is expected to crest at 47.6 feet the morning of 04/09/18.

Sutter & Yolo County:

- Sacramento River at Fremont Weir is expected to reach 33.2 feet the evening of 04/09/18.

Sacramento County:

- Cosumnes River at McConnell is expected to reach 41.9 feet the morning of 04/08/18.

# **SITUATION SUMMARY**

## **Cal OES INLAND REGION (Continued)**

**River Forecast – The following rivers are expected to meet or exceed Monitor Stage:**

Sacramento County:

- Cosumnes River at Michigan Bar is expected to crest at 11.3 feet the evening of 04/07/18.
- Mokelumne River at Benson's Ferry is expected to crest at 12.7 feet the morning of 04/09/18.

Merced County:

- Merced River at Stevinson is expected to crest at 67.2 feet the morning of 04/09/18.

- None reported.

# **WEATHER OF CONCERN**

## **Weather of Concern**

- An Atmospheric River will impact Northern California today, 04/06/18. It will produce moderate to heavy rain with very low snow levels this evening through tomorrow morning, 04/07/18.
- Moderate rain will continue at times becoming heavy with thunderstorms through the evening hours on Saturday, 04/07/18.
  - Snow levels will fall to 5,000 – 6,000 feet.
- Possibility of localized flooding of streams and rivers with debris flow from burn scar areas associated with both systems moving through the region.

# **WEATHER SYNOPSIS BY REGION**

## **NORTHERN CALIFORNIA**

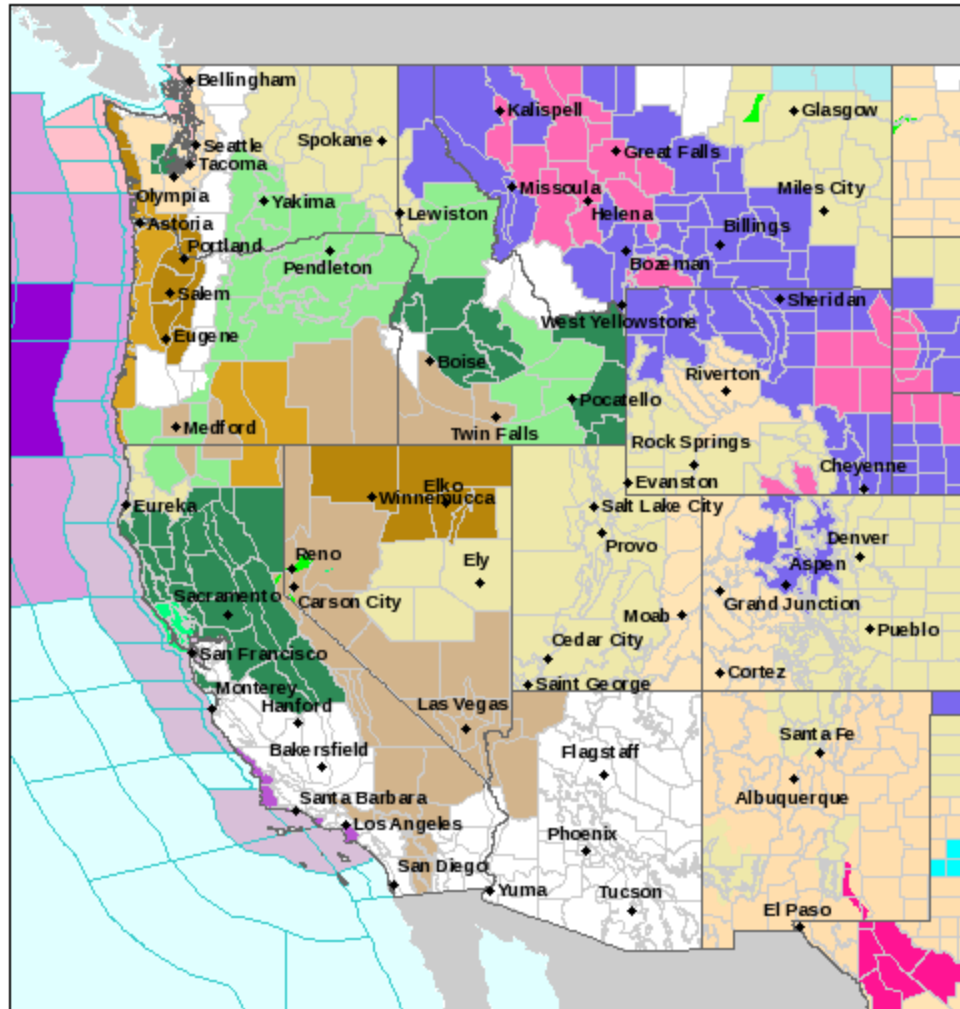

The heaviest precipitation will impact the area today and tomorrow with just a little bit of residual impacts into Sunday. The upcoming moisture event will be a high end wetting period for the region. It will be a rain on snow impact event. Southerly winds will also continue to increase and peak tonight and tomorrow as the Pacific cold front moves through. Gusts between 40 to 50 mph could be observed during the peak wind period with wind directions becoming more W-SW. Humidity will remain high during the strongest wind period thus marginalizing the threat. Weather models remain consistent with their depiction of the weather scene next week. Brief ridging on Monday before a couple more Pacific system's track over the area. The upcoming systems look to be quick hitters thus leading to a little less moisture impact compared to if they were 4 day events. Either way, wetting moisture is expected and appears to favor the northern tier of the area versus southern portions. Gusty S-SW breezes would develop ahead of each low. The models indicate a pattern change towards an active strong jet period across the northern Pacific the next few weeks. This means timely moisture intrusions are likely although amounts should be less impactful and favor the northern tier. Stronger W-SW ridgetops winds would also be expected.

## **SOUTHERN CALIFORNIA**

Temperatures will cool a little and humidity will become high today and tomorrow as a Pacific storm moves inland to our north. Periods of rain will start over the northern portions of Central California this morning and then slowly work southward reaching the region tomorrow morning or afternoon. All the rainfall associated with this storm will come to an end tomorrow evening. Most Sierra and Central Coast locations are still expected to receive between 2 and 6 inches of rainfall, but most of the region now looks to receive less than a tenth of an inch of rainfall. Westerly winds of 20 to 40 mph with gusts to 60 mph will surface across the wind prone mountain and desert areas this afternoon through tomorrow evening. A weak ridge of high pressure will build into California from the Pacific Ocean bringing a warming and drying trend to the region Sunday and Monday. Temperatures will be 5 to 10 degrees above normal and minimum humidity will be mainly in the teens by Monday. A weak Pacific trough will bring a cooling trend and a big increase in humidity Tuesday through Thursday. This trough will also bring scattered showers to Central California at times with light rainfall totals expected. There will be strong and gusty westerly winds across the mountains and deserts Tuesday afternoon through Thursday evening.

# Cal OES LAW ENFORCEMENT MISSIONS

## Cal OES Law Missions

- **2018-LAW-45974, 04/05/18, 0600 hours:** International Emergency Response Coordination Center (IERCC) is requesting resources to locate and silence an active in-reach device. The device is sounding at coordinates 33° 52 minutes 18 seconds North by -116° 41 minutes 37 seconds West in the area of the Pacific Coast Trail (PCT) south of the I-10. The R/O of the device is complaining of severe abdominal and back pain. Riverside County Sheriff's Department (RCSD) has been notified and is responding. **Mission Ongoing.**
- **2018-LAW-45966, 04/04/18, 1600 hours:** The City of Elk Grove is hosting the AMGEN international bicycle race on 05/17/18. Elk Grove Police Department (EGPD) via the Region IV Regional Mutual Aid Coordinator (RMAC), Sacramento County Sheriff's Department (SCSD) is requesting the California National Guard (CNG) 95th Civil Support Team (CST) assist with the security of this event. CNG has accepted the mission. **Mission Ongoing.**

# Cal OES MISSION TASKING

## Cal OES Missions

- **2018-IREOC-45244:** Caltrans to remove dead and dying trees along highways in Kern, Tulare, Fresno, Madera, Mariposa, Tuolumne, Calaveras, Butte, Plumas, Sierra, Shasta, and Lassen counties. (On Scene – Long-term assignment)
- **2017-SOC-44098:** CalRecycle Debris Management Team in Ventura County (Coordinating)
- **2017-SOC-43821:** DTSC to remove household hazardous waste from over 500 residential lots in Ventura County (On Scene)
- **2017-Inland-42559:** Weather station installed to gather real time rainfall data by Air Resources Control Board (On Scene)
